# QF News

WINTER 2018

## *Project Delivery Unlimited Windfarm Lands at Ellesmere Port*

Quality Freight successfully handled its biggest project to date, with its client Enercon charging Ellesmere Port with handling and storage of 16 no. wind turbines that were dispatched to Mid-Wales.

Managing Director, Sebastian Gardiner says " This major project highlighted in full the abilities and adaptability of the Ellesmere Port team."

# QF Air Charter

QF Belfast was significantly involved in the movement of a Kleeman Screener moving from Northern Ireland to Prestwick airport to meet a dedicated charter AN124 class Antonov aircraft for direct flight to Liberia.

After initial complications finding an EU departure airport with the right specification x-ray machine to screen, the move was completed in good time. Director Roger Barham says "This was truly a team effort with McCloskey, Kleeman, Stewart International Transport and Prestwick Ground Services all positively impacting the success of the operation."

# River Boat Crossing

Quality Freight West was called into action to transport a large River Cruiser Boat across Ireland and on to Norwich on the east coast of England.

Account Manager Paul McGovern says "The project move involved careful coordination with local authorities, obtaining permits and road escorts when required, to ensure transit in a timely manner."

# Arctic Monkeys

Quality Freight Group's Ellesmere Port operation stepped up to deliver one of its most complicated heavy lifts during the recent 'cold snap' in the UK.

The package involved the handling of 87 no. pieces of a manufacturing plant for its global forwarding partner, which landed at the end of February during the worst UK weather for 10 years.

Using QF's own resources and third parties as was necessary, pieces were discharged to transport either for direct movement to the site, or to the on-site laydown area for re-loading at a later date.

## Biomass Contract

QUALITY FREIGHT LTD, DUBLIN have been awarded the contract for the shipment of 10,000 tons of biomass material ex Ireland to a UK power plant near Grimsby.

Director Derry Connolly said "The Miscanthus biomass is classified as Hazardous Class 4.1 'at Sea' only, so it was necessary for a Dangerous Good Note and hazardous class labelling for each of the 850 x 13.6m trailers used during that element of its door to door transport to the UK".

## Team Éirloop Innovation Gold

Quality Freight partnered with our WCA friends Green Worldwide to assist Team Éirloop who were participating in a global competition at Elon Musk's aerospace company, SpaceX. The team, who are made up of the top engineering scholars from Universities across Ireland, design pods which travel within vacuum sealed tubes, known as Hyperloops. The team was highly successful bringing home the innovation prize! QF was able to move the pods from Dublin to the campus in Hawthorne, California. Delivery was made on time, but not at the speeds that the pods will ultimately travel at!

# New Quality Freight Group Website !!!!!

Quality Freight Group are pleased to announce the recent launch of our newly redesigned website!

The newly launched site is available now, with the URL [www.QualityFreight.com](http://www.QualityFreight.com)

The new navigation settings, streamlined menus, and responsive layout will provide our visitors with an efficient way to learn about Quality Freight Group's logistic solutions and port services for all platforms providing more resources and information on our products and services.

Please view the "News Section" for constant updates on our content with helpful information, articles, blogs, newsletters, company announcements and client successes.

If you have any questions or feedback you would like to share with our team, please do so by filling out the form on our Contact us page or speaking with your local representative.

**We look forward to staying connected !!!**
